Customer Reviews

In this go around, the Pretty Little Liars have tried to move on with their lives, and put the entire A thing past them, and they know that Alison is out there, even if nobody believe them, including the police and the FBI. Hanna: She's found her acting bug, and is encouraged to star in a movie about what happened to them. Hanna befriends the girl who is to play her. A few things happen, and Hanna is thrust into the lime light, even though she may not be ready for it, and there's kind of a price she pays. Aria: She's become an artist, and soon finds that a very wealthy investor takes an interest in her work, and is very pleased to finally be entering the Art World. However, someone is waiting for her, and is ready to destroy her in a moments notice. Spencer: Spencer has had enough of bullying from A. She starts an Anti-Bullying webpage and in a way it's a release from all the stress

and bullying from A. Others have posted on her site about how they were bullied, and it becomes a support group. That being said, everyone isn't pleased with Spencer, and they've formed a group of their own, and will do anything to bring Spencer and the PLL's down. They support Alison. Emily: Emily is just trying to survive. She's facing a lot, and then gets support from a source that she thought she lost sometime ago. Emily has had enough of A, and just wants to get on with her life. Emily has other problems besides A, her personal life is also crumbling, and Alison is happy to add to her misery. ***Could be some spoilers***** Spencer really annoyed me in this book. She tells a stranger all that has happened to her, and how they plan to fight Alison. This is very unSpencer like. It seemed that all of sudden Spencer is an idiot.
