Synopsis

There is something special about cancer compared to other diseases. It is a horrific disease that has defied attempts to find a reliable cure. Life spans after diagnosis have increased, but the mortality rate has remained about the same even after 40 years of extensive research. Cancer provides a major scientific challenge. Tumors evolve and spread in response to internal and external factors that involve feed-back mechanisms and non-linear behavior. In recent years, physicists have become involved in studying cancer, with the ultimate aim of finding a cure. Physicists approach a problem with unique experimental, theoretical, and computational skills and perspectives. This book will be comprised of chapters written by physicists from all over the world who perform research on cancer. They will describe their research and summarize their results.

Book Information

Hardcover: 200 pages

Publisher: World Scientific Publishing Company (May 30, 2016)

Language: English

ISBN-10: 9814730254

ISBN-13: 978-9814730259

Product Dimensions: 6.7 x 0.6 x 9.8 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)
