Veterinary Medical School Admission Requirements (VMSAR): 2016 Edition For 2017 Matriculation (Veterinary Medical School Admission Requirements In The United States And Canada)

Synopsis

Fully up-to-date and packed with useful tips and helpful insights, this publication provides a comprehensive overview of the admission process for the national and international veterinary schools that are members of the Association of American Veterinary Medical Colleges (AAVMC). As the official guide to getting into vet school, it provides hundreds of pages of must-have information, essential to achieving your goal of becoming a veterinarian. The heart of the book is a directory of member schools, providing the following information for each school: a summary of application procedures; requirements for application and residency; prerequisites for admission; deadlines for each component of the application process; a description of campus and campus life; and the costs of tuition and fees. Full-page spreads provide a complete profile of the different campuses and clearly lay out all the details you need to select the school that matches your needs best. Additional information includes an overview of the Veterinary Medical College Application Service (VMCAS), information about the accreditation of veterinary schools and professional licensure as a veterinarian, a helpful timeline for aspiring vets from high school onward, and firsthand accounts from current students and practitioners about what it's like to train as a vet. The book provides the best concise, current, and comparative information for students interested in preparing for a career in veterinary medicine, as well as their advisors and counselors. It is the essential guide to becoming a DVM. As Executive Director of AAVMC Dr. Andrew McCabe writes, "These are exciting times for veterinary medicine, a profession that bridges animal, human, and ecosystem health. We understand that getting started and making sense of all the choices and requirements can be challenging, but you've come to the right place by accessing this publication, which provides the essential information you need to begin your journey."

Book Information

Series: Veterinary Medical School Admission Requirements in the United States and Canada

Paperback: 180 pages

Publisher: Purdue University Press; 1 edition (April 15, 2016)

Language: English

ISBN-10: 1557537429

Customer Reviews

I was really looking forward to getting this book. Navigating the admission requirements for veterinary schools has been difficult. Unlike other professional programs, each veterinary school has different requirements. For some schools this just means additional courses must be taken. For others it may mean that specific courses must have specific prerequisites in order to satisfy the school's requirements or must be taken at a 4 year university as opposed to a community college. Sadly, this guide does not always notify the user of these vital subtleties. For example, the guide only notes 3 things for the University of Illinois under "Prerequisites for Admission." These include 8 hours of biological science, 16 hours of chemical science, and 8 hours of physics. Head to U of I's website and you see that biochemistry is a required course and the only qualifying course is one that has organic chemistry as a prerequisite. A slew of profiles for other schools also fail to note this. Not all undergraduate universities (including mine) offer biochemistry with an organic prerequisite. Someone relying on this guide could be forced to retake biochemistry in order to fulfill this requirement because they simply did not know about it. The book is also completely inconsistent with its break down of required courses. For example, the guide lists out each course requirement completely for some schools, noting that some must be taken at 4 year universities etc. while others simply direct you to the school's website! Really? What was the purpose of purchasing a book on veterinary school requirements if you are just going to direct me to the school's website?!
